## PROFESSIONAL EXPERIENCE

**IT Project Management Intern (M.Sc. Final Year Internship), Bassetti Group** 03/2025 – 08/2025 | Lyon, France

Technical Side:

- Backend: Designed database schemas (PostgreSQL), developed ETL pipelines (C#/.NET), and built KPI dashboards using TxBI.
- Frontend: Actively contributed to the design and implementation of professional, user-centered UI/UX interfaces (.aspx).

Functional Side:

- Main point of contact for international clients (Framatome, Safran, Michelin, etc.) for project follow-up and technical coordination.
- Contributed to defining project scope, gathering and formalizing business requirements, and writing functional specifications.
- Managed and prioritized the product backlog in collaboration with stakeholders.
- Planned and facilitated sprints in an **Agile (Scrum)** environment.
- Monitored timelines, quality, and budget, with regular reporting on project milestones.
- Ongoing courses at Bassetti Academy to strengthen project management skills.

**Teaching Assistant, Université Claude Bernard Lyon 1** 10/2024 – 02/2025 | Lyon, France

- Taught Python programming language to freshmen.

**Plaza Hotel Website (B.Eng. Graduation Project), AASTMT** 09/2023 – 08/2024 | Alexandria, Egypt

Systems design | Concurrency control | RESTful API | NodeJs | ReactJs | TypeScript | MySQL | Docker | GitLab | HTML | PayPal.

Three-Part Full-Stack Project:

User Side:

Booking system with real-time availability checks, secure payments via PayPal, and enhanced authentication.

Receptionist Dashboard:

Simplified check-in/check-out management, real-time room tracking, and access to customer profiles.

Administrator Dashboard:

Room management (CRUD operations), management of promotional offers.

My Responsibilities:

- System design.
- Database modeling (schema design).
- Database administration: queries, transactions, concurrency control, security, and optimization.
- Backend development of REST APIs (Controller, Service, Repository).
- Integration of PayPal payment services.

## EDUCATION

**Master's Degree - Development, Data & Management, POLYTECH Lyon** 09/2024 – 09/2025 | Lyon, France

- **Topics:** Web & Mobile Development, Data Engineering, Software Engineering, NoSQL, AI, Business Strategy & Management.
- **Technologies:** Java, C#, Python, Kafka, SQL, PostgreSQL, MongoDB, Oracle, Neo4j, Redis, Postman, Docker, Apache Spark, Hadoop, Talend, Tableau, Power BI, Android Studio, Visual Studio, Tensorflow.

**Bachelor's Degree in Computer Engineering,** 09/2019 – 07/2024 | Alexandria, Egypt

Arab Academy for Science, Technology & Maritime Transport

- **GPA 3.91** – Ranked **5th out of 170** students

## SELECTED PROJECTS

**Portfolio - Personal Website [Live]**  [Angular](#) | [EmailJS](#) | [Docker](#) | [Vercel](#)

Modern Angular portfolio showcasing my full-stack projects, built for performance and clean UX. Features category filtering, smooth CSS animations, multi-page navigation, contact functionality, and English/French language support. [Source Code](#) 

**Patient Management Service,**

[Spring Boot](#) | [Kafka](#) | [gRPC](#) | [Microservices](#) | [Docker](#) | [Protobuf](#) | [Postgresql](#) | [Api Gateway](#) | [AWS infra](#) | [Integration Testing](#)

Microservices-based patient management backend built with Spring Boot, structured with Controller–Service–Repository architecture. Includes patient, billing, analytics, and auth services behind an API Gateway, using Kafka and gRPC for communication, PostgreSQL for storage, Docker for containerization, and integration tests for reliability. [Source Code](#) 

**Shipment Tracking System [Live Demo]**  [Angular](#) | [Spring Boot](#) | [WebSockets](#) | [Tailwind CSS](#) | [Docker](#)

Real-time shipment tracking application with create/update features and instant WebSocket notifications. Built with Angular and Spring Boot, deployed on Vercel and Render, following a clean Controller–Service–Repository architecture. [Source Code](#) 

**Task Manager [Live Demo]**  [Angular](#) | [Vercel](#) | [Tailwind CSS](#) | [Docker](#)

Simple task management application built with Angular, allowing users to create, organize, and track their tasks. Deployed on Vercel with a clean and responsive UI. [Source Code](#) 

## SKILLS

**Methodologies & tools:** Agile (Scrum), CI/CD pipelines, Jira, GitLab, Confluence, Unit Testing, Integration Testing, Code Review, Peer Review.

**Programming Languages:** Java, C#, Python, TypeScript, JavaScript, SQL, Bash, Shell (Linux), PHP.

**Frontend:** AngularJS, ReactJS, HTML5, CSS3

**Backend:** SpringBoot, .NET, NodeJs, Kafka, RabbitMQ, gRPC, Protobuf.

**Databases:** PostgreSQL, MongoDB, Redis, Neo4j.

**DevOps & Cloud tools:** AWS, Docker, Linux.

## LANGUAGES

**English:** C1 | **Français:** C1
